Hello,

I am excited about the Product Designer position at Kriptomat and eager to contribute my extensive background in designing exceptional user experiences for web and mobile platforms, aligning seamlessly with your emphasis on creating new products.

In my recent role as Lead Product Designer at Eir in Dublin, Ireland, I specialized in outlining customer journeys to provide top-notch experiences. This aligns well with your focus on designing and developing new products at Kriptoma

During my tenure at Matrix Internet and Point Blank, I collaborated with cross-functional teams, gathering and evaluating user requirements, and contributing to technical and business requirements, similar to the role at Kriptomat.

My proficiency in design tools like Figma, InVision, and Sketch, along with my detail-oriented approach and problem-solving skills, make me well-suited for your role's challenges. Throughout my career, I consistently applied usability principles in human-computer interaction, creating intuitive, user-centered solutions as your role requires.

Additionally, my proactive communication style, quick delivery, and experience in the cryptocurrency industry further position me as a strong candidate for this role. I am excited about the prospect of bringing my skills and passion to Kriptomat and contributing to your innovative fintech company's success.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with your team's needs.

Sincerly,
Wellington Alexander
